

Axcess™ BestBuilt Binders

With sturdy construction
and quality features these
binders will last a lifetime.

from **npsg**

BestBuilt Binders have features that can withstand even the toughest conditions.

Sturdy — Overlapping rings stay shut so pages won't fall out, even if dropped.

Durable — Grease and dirt wipe off using any industrial or household cleaner.

Versatile — 5 colored spines allow for easy color-coding and quick identification.

BestBuilt Binders are the perfect choice when durability and functionality are mandatory. They're great for storing safety standards, emergency procedures, operating instructions, shipping charts, manufacturer's MSDS sheets and more.

These Binders are built to last.

Sturdy construction. One-piece injection molded spines and indestructible spot-welded covers mean no splits, tears, cracks or frays—guaranteed. Poly-propylene is impervious to dust, dirt and moisture. Built-in safety latch...drop it, throw it, step on it...the heavy duty mechanism will not accidentally spring open!

3-position rings. Closed, browse and fully opened positions allow fast and easy access to every page in the binder. 3-position finger touch trigger mechanism is easier to operate than ordinary binders.

Elliptical shaped rings. Exclusive ring design makes it easier to flip through pages. **Rings overlap and will never gap—guaranteed!** Smooth tapered tips allow for easy loading.

Easy indexing. Colored spines with black covers for easy color-coding of information. Large label area for neat and clear indexing allows faster access to your documents.

Extra room. The additional depth of BestBuilt Binder covers means that divider tabs won't extend beyond the edge. The 2 1/4" binders hold over 500 sheets of letter-size paper! Binders measure 11 1/2"h x 2 1/4"w x 11 1/2"d

Lifetime guarantee. Each Binder is guaranteed to last a lifetime. If for any reason you are not completely satisfied with your binder, it will be replaced free of charge.
