

Axcess™ CombiBoard

Versatile 3-in-1 mobile presentation systems.

from 

CombiBoards offer complete presentation capabilities — all in one unit.

It's a magnetized whiteboard...

Our 3-in-1 Mobile CombiBoards create versatile presentation capabilities. On one side, a magnetized write-on/wipe-off surface allows you to create colorful dry-erase marking pen and magnetic accessory presentations. On the reverse side, a blue fabric-covered surface over a honeycomb core creates a pushpin presentation board, great for lectures and workshops. Snap-on flipchart clips (included) allow you to affix any standard-size pad for flipchart presentations. Boards also include a snap-on tray for markers, eraser, and other accessories.

Leg clamp links multiple CombiBoards together.

Boards have a sleek, modern look with anodized aluminum frames and durable stands constructed from powder-coated, oval steel tubing. Unique angled feet allow multiple CombiBoards to be used side-by-side and, if desired, can create a curved seamless backdrop. Stand pieces remove in seconds with the pinch of a button making set-up, take-down, and transport fast and easy. Each board comes complete with four locking casters, leveling feet for stationary use, and leg connecting clamp.

CombiBoardXL provides spacious 47 1/4" x 59" board.

CombiBoards are available in two sizes. The Standard features a 30" w x 47 1/4" board that can be used in two different height positions, either 18" or 28" off the ground. If more presentation surface is required, the XL offers a spacious 47 1/4" x 59" board that can be used vertically or horizontally. Light assembly required.

a flipchart board...

and a presentation board!
